

## 改造后的 Loil 广场

Loil

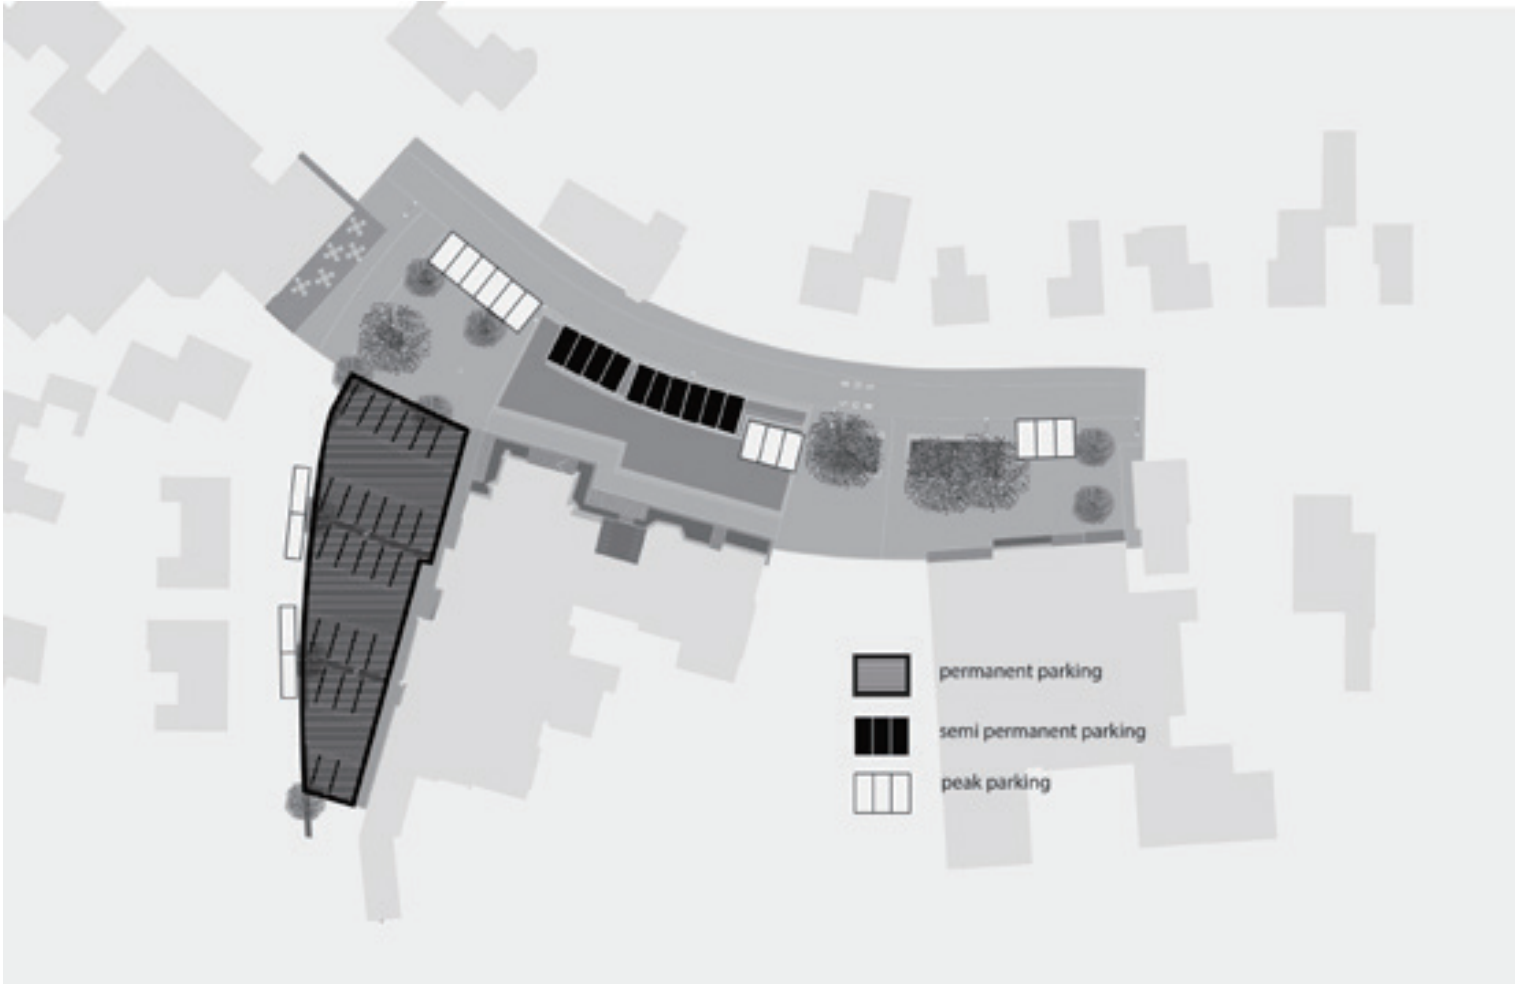

设计公司：ELYPs Landscape + Urban Design

地点：The Netherlands（荷兰）

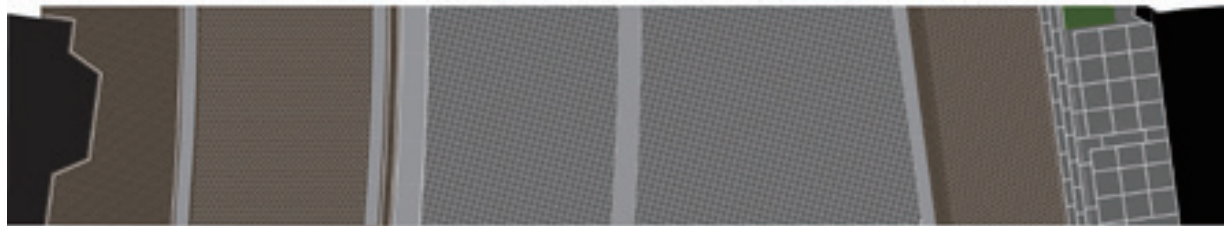

面积：4 200 m<sup>2</sup>

The aim was to give the church a square of its own and facilitate all the cultural and social events. This was a problem, because of the amount of parking spaces needed. Analyses showed that there was quite a difference in the need for parking spaces during the year. When the soccer club wins the competition, or when there is a wedding, there is always a shortage. But on normal weekdays far less parking spaces are needed. This made it possible to move the more permanent parking spaces to the side of the church, so creating room for an atmospheric church square. With introducing a long bench, combined with the clear design of the parking spaces on the side of the church, the people are less likely to park on the church square (which is allowed). Thus leaving the square most of the time function as a church square, enhancing the function of the church.

教堂广场原本是为举办教堂文化活动而设计的。现在，停车位的需求量增加，之前的停车空间已经不能满足需求了。分析显示，最近一年人们对于停车位的需求量猛增。每逢足球俱乐部赢了比赛，或者新人在此举办婚礼，车位数量明显就不够了。但是，在办公时间，人们对车位的需求量则大大减少。这使得设计师考虑将停车场布置在教堂旁边，将教堂前的空地留出来供活动使用。设计师在广场上设置了长椅，这样人们就很难在这里停车了。这使得教堂前广场的功能得以加强。
